Muhammad Usman

UI/UX Designer | 3+ Years of Experience

Address: Islamabad, Pakistan | **Phone:** 0312-0575778 | Portfolio | LinkedIn | Behance | Email

Summary

UI/UX Designer with experience in designing user friendly websites, mobile applications, and SaaS platforms. Skilled in understanding business requirements, identifying user pain points, and transforming complex ideas into simple and effective design solutions. Focused on creating clean, intuitive, and user centered experiences while continuously improving design skills and contributing to team success.

Experience

Teo International

2023 – Present

UI/UX Designer | Full time

Task Manager (03/2026-11/2026)

- Designed a SaaS dashboard with an integrated task management module to **help users organize, assign, and track tasks efficiently.**
- Worked on task creation, priority management, deadlines, status tracking, and team assignments.
- Focused on creating intuitive dashboard layouts and simplifying workflows to improve team productivity.

Deliverables: 30+ UI Screens · 12+ User Flows · SaaS Dashboard Design · Task Management Module · Interactive Prototypes · Developer Handoff

Nordlys AI (09/2024-02/2026)

- Designed an end to end healthcare platform with AI assisted documentation, reducing consultation time from **20 minutes to 5 minutes** and improving doctor efficiency.
- Designed key features including patient profiles, **appointment management, medical history, and patient journals.**
- Created a **SOAP based clinical documentation** workflow to help doctors record consultations efficiently.
- **Integrated AI assisted consultation summaries** to reduce manual documentation and simplify post consultation tasks.

Deliverables: 100+ UI Screens · 30+ User Flows · UX Research · AI-Powered Products · Design System · Developer Handoff

MV (09/2023 to 08/2024

- Designed a company management and file management platform that allows users to **create companies, organize business information, and manage documents in one place.**
- Designed intuitive upload workflows for handling **different types of files, notes, and company related information.**
- Collaborated with stakeholders and developers to understand requirements, solve UX challenges, and deliver practical design solutions.

Deliverables: File Management System · 80+ UI Screens · 25+ User Flows · SaaS Platform Design · Developer Handoff

SMART (03/2023 to 08/2023)

- Built a centralized platform for skill tracking and project allocation, giving Country Managers real-time visibility and **cutting manual tracking by 100%.**

Deliverables: 100+ UI Screens · 30+ User Flows · Resource Management · Billing Module · Learning Management System · Developer Handoff

BOT Solutions

Dec 2022 - Feb 2023

UI/UX Designer | Contract

- Design **Gulf VPN** application, successfully published on the Google Play Store.
- Created user flows, wireframes, and prototypes in Figma, **increasing user engagement by 10% in the initial release.**

Deliverables: 8+ UI Screens · 5+ User Flows · Design System · Developer Handoff

Alright Tech Private Limited

Sep 2022 - Nov 2022

UI/UX Designer | Internship

- Learned UI/UX design fundamentals while actively working on real world projects.
- Contributed to project designs by **creating wireframes, user flows, and UI screens using Figma.**
- Gained practical experience in **UX research, problem solving, prototyping, and collaborating with the design team.**

Design Skills

- UX Research
- User Flows & Journey Maps
- Information Architecture
- Onboarding & UX Writing
- Competitive Analysis
- Usability Testing
- Design System
- Stakeholder Collaboration
- AI Product Design
- Data Visualization
- Responsive Web & Mobile Design
- Complex Workflow Design
- User-centered Design
- B2B Saas Design
- End-to-End UX Process
- Cross-Functional Collaboration
- AI-Powered Product Design
- Developer Handoff

Design Tools

UI/UX Design: Figma

Graphics Design: Adobe Illustrator

Web Development: HTML, CSS, JavaScript(basic), Framer

AI Tools: Claude Design, Google Stitch, Figma Agent, Figma Make, Figma Sites, Midjourney

User Guide Video Tool: Focusee

Soft Skills

- Adaptability & Flexibility
- Team Collaboration
- Problem Solving
- Time Management

Industries Experience

- Healthcare
- SaaS & Business Applications
- E-commerce
- AI-Powered Products

Certification & Achievements

- Foundation Of User Experience (UX) Design
- Start the UX Design Process Empathize Define
- Build Wireframes and Low Fidelity Prototypes
- Principles Of UIUX
- Advanced Prototyping and Animation Mastery Course
- AI for Designer (IxDF Certification)

Education

Bachelor in Software Engineering: 2018- 2022

Language

Urdu: Native | **English:** Fluent
